

Dixon/Solano RCD Water Quality Coalition

Ulatis Creek at Brown Road Water Quality Monitoring Schedule for 2026

Year 2026 is a non-assessment year which means we only monitor for constituents specified in the Management Plan (MP) and for single exceedances observed during that assessment year therefore requiring follow-up.

For Ulatis Creek at Brown Road MP specifies monitoring in December and May for pyrethroids and April for *Hyalella* in sediment.

Constituents	Dec. 2025	Mar. 2026	Apr. 2026	May 2026
Field Measured Group	X	X	X	X
E. coli		X		X
Ammonia, Total as N		X		
Dissolved Organic Carbon	X			X
Total Organic Carbon	X			X
TMDL Pyrethroids	X			X
<i>Hyalella azteca</i> (water)	X			X
<i>Hyalella azteca</i> (sediment)			X	
Grain Size (sediment)			X	
Total Organic Carbon (sediment)			X	
completed monitoring	No pyrethroid exceedance in Dec. 2025			
upcoming monitoring				

TMDL - Total Maximum Daily Loads is the calculation of the maximum amount of a pollutant allowed to enter a waterbody so that the waterbody will meet and continue to meet water quality standards for that particular pollutant.
