

	ILRP Trigger Limit (µg/L)^	U.S. EPA Aquatic Life Benchmark for Invertebrates	
Fenpropathrin	0.0015	0.0015	Should not be a problem
Imidacloprid	0.016	0.01	Exceedances are likely
Dichlorvos (DDVP)	0.0122	0.0058	Can Caltest achieve a lower MDL?
Oxyfluorfen	0.22	13	Exceedances are likely
Chlorothalonil	2	0.6	Should not be a problem
Paraquat Dichloride	0.33	97	Can Weck achieve a lower MDL?
Clothianidin	0.13	0.05	Should not be a problem
Diuron*	3.08*	0.83	*Should not be a problem at 2.0 µg/L
Pendimethalin	5.2	14.5	Should not be a problem
Trifluralin	2.53	2.4	Should not be a problem

^ Trigger Limits in effect starting April 25, 2026

* The existing trigger limit for diuron of 2.0 µg/L remains in effect for waterbodies with a MUN beneficial use
